COURSE - MCA B

① Calculate factorial of a number

```
class factorial {  
    public static void main (String args[])
```

```
    {  
        int n = 5;
```

```
        int ans = 1;
```

```
        for (int i = 1; i ≤ n; i++)
```

```
            ans = ans * i;
```

```
    }  
}
```

```
    System.out.println (ans);
```

```
3  
}
```
